

## DESCRIPTION

Foam Masking Tape is used to mask/close door and hood openings before painting, in order to prevent paint and dust from entering the vehicle during painting of surfaces. Foam Masking Tape offers an effective solution for time-consuming masking processes before painting the surfaces. It prevents sharp paint transitions and creates a soft surface on the painted edge.

## USAGE AREA

Foam Masking Tape is used during painting and repairing of automobile bodies and parts. The product is used to prevent paint and dust from entering the vehicle during the painting process of all parts of the vehicles such as hood, bonnet and door.

## SPECIFICATIONS

- Provides excellent adhesion to the vehicle body and working surfaces,
- Suitable for vehicle body and part shape,
- Can be used in all painting stages,
- Creates a soft edge during application,
- Provides highly efficient protection by masking quickly and effectively.
- When removed, it leaves no adhesive residue and traces on the surface,
- Self-adhesive and solvent resistant,
- Resistant to 80 °C heat.

## DIMENSIONS

Foam Masking Tape consists of juxtaposing 10 strips/wraps side-by-side, each of wrap has 13 mm x 11 mm width and 5 meters length.

**Length:** 5 Meters x 10 pieces = 50 meters in total.

The product is roll-shaped and white in color.

It is also possible to produce the product in different widths according to demand.
